Abstract (en)

[origin: EP0105504A1] 1. A method of dismantling floor slab forms comprising units (2) composed of a plurality of form panels which in particular are adapted to be joined at the side edges, said units being gripped from underneath with a lifting appliance (1), detached from the composite construction of the floor slab formwork, lowered, swivelled and laid down, characterized in that after having been detached from the floor slab formwork the units (2) of form panels are partly lowered by at least half of their expanse extending parallel to a swivel axis (6), are turned with their underside on top and afterwards are finally laid down, and are dismantled on their reverse side now directed upwardly.
