Abstract (en)
[origin: EP0105557A2] The machine comprises a gantry (1) provided with wheels (2) and equipped with a drum (3) inside which is arranged the system for feeding the binding band. The latter is guided inside an arch (4) for surrounding the package to be packaged, the drum (3) and the arch (4) being able to rotate by a 90 DEG arc of a circle (6) until being disposed at the horizontal, which makes it possible for bindings along vertical planes and along horizontal planes, and also along all the intermediate planes, to be provided on the same package. <IMAGE>
