Abstract (en)

The invention relates to a binder system which includes as a single integral unit a support device (12) for supporting a pair of binder strap securing means (14) as well as suspension means (27, 29), for suspending the system in either a mode of horizontal filing or lateral filing. In addition, the support device makes provision for a cover sheet (22) to be clamped relative to the device along an edge portion (20) thereof.
