Abstract (en)
[origin: EP0106215A2] 1. A dustproof folding box, its bottom and/or top being formed of two closure flops (3, 4) hingedly connected to the side walls (1, 2) and overlapping each other only partially, and of two dust flaps (7) hingedly connected to the front walls (5, 6), whereby only one (4) of both closure flaps (3, 4) comprises at its free section a stamping (9) along a straight line (8) at which the other closure flap (3) is ending, in the same region the dust flaps (7) comprise a stamping (10) projecting inwardly and also extending along a straight line (11), and whereby one closure flap (4) is positioned between the other closure flap (3) and said dust flaps (7), characterized in that the stamping (9) of said one closure flap (4) is projecting inwardly and contacting the stamping (10) of both dust flaps (7).
