Abstract (en)
[origin: EP0107218A1] A process for the manufacture of endless metal bands, suitable as part of a composite metal drive belt. The endless metal bands can be manufactured from plate metal (1) which is welded together edge to edge to obtain a pipe (2) whose length is equal to at least a multiple of the width of the metal bands. Ringshaped parts (4) having substantially the same width as the bands are cutted off from the pipe.
