Abstract (en)

1. Under-floor heating installation comprising a metal grid or mesh structure placed on a support surface (9) and a tube (13) placed above the structure, in which the heating fluid circulates, this tube (13) being secured to the structure by means of support clips (16), characterized in that the structure comprises, in addition to a first grid (6, 7) defining an upper plane, a second grid (2) defining a lower plane parallel to the upper plane formed by the first grid (6, 7), the two grids being rigidly connected to each other by linking elements (5), each support clip being fixed to bars of both grids.

Abstract (fr)

Structure à treillis. Elle comprend un treillis inférieur constitué de barres (1, 2) entrecroisées et un treillis supérieur constitué de barres (6, 7) entrecroisées. Les deux treillis sont reliés entre eux par des éléments de liaison (7). Application aux installations de chauffage de bâtiments par le sol.
