Abstract (en)

[origin: EP0108389A2] 1. A paper insertion device for printers, in particular typewriters or similar office machines, comprising a platen (S), a paper transport shaft (P) which can be pivoted into contact with the platen (S) and which carries rolls of paper, and a paper-end scanner which is arranged in the paper supply region and scans for the presence of paper, characterised in that a common electrical warning device (EL, W) is provided which is mechanically linked both to the paper-end scanner (AE) and to the paper transport shaft (P) and which is so designed that when the paper transport shaft (P) is pivoted out of contact and/or in the absence of paper, a warning signal (W) is triggered.
