Abstract (en)

[origin: WO8304004A1] In a rotary press comprising a cylinder provided with a blanchet (2) and a printing cylinder (3), the blanchet is replaced by a mounting sheet (5) on which are arranged band-shaped tools (6). The arrangement of the tools (6) corresponds to the perforations, punchings or grooves to be effected on the paper, respectively on the cardboard passing through the rotary press. On the printing cylinder (3) a plane protection sheet (7) is arranged. Both sheets (5 and 7) may be used several times and, owing to means available on the press, they may be rapidly mounted and disassembled.
