Abstract (en)
[origin: EP0108887A2] 1. Device for uniform application of free-flowing media, if appropriate via a template (22), to a carrier or a web of goods (23), the discharge channel (20) for the medium being preceded by a positive-displacement pump arrangement with toothed rolls (3, 4), characterised in that the positive-displacement pump arrangement has two toothed rolls (3, 4) floating in a housing (1), and in that the toothed rolls (3, 4) are movable up to contact with the internal wall.
