Abstract (en)  
[origin: EP0109181A1] A modular unit (10) for a building toy or model system is of shallow formation having sets of intercoupling projections (13, 14) on sides (11) thereof. The projections are of two types, each type interfitting with the other type so as to afford a choice of relative angular positions of interengaged members or so as to afford a choice of hinged and non-hinged interengagement.
