Abstract (en)

[origin: US4536922A] An attachment device for attaching a strap to a decorative article which includes a lateral support provided on the article and having a throughgoing bore, a loop portion provided on the strap, a shaft slidably mounted in the bore and passing through the loop, the shaft having an enlarged head portion on one end thereof, a spring for biasing the head portion away from the lateral support, and removable locking means for engaging the other end of the shaft to prevent withdrawal of the shaft from the bore, the shaft being movable between a first position wherein the locking means is positioned outside the attachment device for removal thereof and a second position wherein the locking device is moved by the spring to within the attachment device and is therefore substantially nonaccessible.
