Abstract (en)
[origin: EP0109558A2] A rack for holding a plurality of tubes comprises a support member having a plurality of holes therein for receiving tubes. Each hole has a substantially flat wall portion surrounding same to prevent rotation of a tube placed therein. A tube rack assembly comprises a rack substantially as described above, further including a tube in one of the holes. The tube has a closed end portion with at least one substantially flat wall surface in face-to-face alignment with the flat wall portion so that rotation of the tube in the hole is prevented.
