Abstract (en)

Metallised flat articles of good flexibility and textile character are obtained when woven fabrics, knitted fabrics, nonwovens and the like are first coated by wet chemical means or by vapour deposition with a thin metal layer and the latter is then reinforced by electroplating.

Abstract (de)

Metallisierte Flächegebilde mit guter Flexibilität und textilem Charakter erhält man, wenn man Gewebe, Gewirke, Vliese u. dgl. zunächst naßchemisch oder durch Aufdampfen mit einer dünnen Metallschicht überzieht und diese anschließend galvanisch verstärkt.
