Abstract (en)

[origin: EP0110112A1] 1. A table clock with an electronically controlled display device, having a clock case (2) and at least one display window (11, 12, 13, 14, 15) serving for the output of alphanumeric characters, characterised in that the display window or the display windows (11, 12, 13, 14, 15) is or are disposed on a display panel (6, 6') which is mechanically connected to the clock case (2) by means of a plug-in connection (16) by means of metal pins (20) and metal sockets (18) and that the electrical connections, associated with one another, of an electrical switching circuit present inside the clock case (2) and the display panel (6, 6') are also brought into contact with one another by the same plug-in connection (16).
