Abstract (en)
[origin: EP0110436A2] The ventilation grille comprises a hollow profiled section with openings or slots in a line in both sides. A slide inside the profiled section works against the openings in one side, and can be moved in its transverse direction so as to open or shut them. A gauze screen can be mounted between the slide and each of the sets of openings, and the slide can be of hollow box-section. Seals can be mounted along the top and bottom opening edges for their entire length, the side bearing against them. FL
