Abstract (en)

A suspension system for a venetian blind assembly having a plurality of slats. The suspension system includes slat supporting means (12) for tiltably supporting individual slats (11) with a pivot member (14, 18, 20) connected to the ends of each slat support means. The pivot members (14, 18, 20) are pivotally connected to holding means (16, 24, 50, 60) which are in turn connected to fixed frame members (3). The holding means may be pivotally connected to the fixed frame members and may include spring means (24, 53) for urging a pivot member towards a fixed frame member.
