Abstract (en)

[origin: EP0110864A1] 1. Apparatus for storing strip, particularly strip metal, comprising a movable loop car (1) having at least one roller (7) for reversing a supply loop (6) of the strip, and supporting cars (2), which are provided with rollers (4) for carrying the at least one upper course (5) of the loop and which are connected to each other and to the loop car (1) by flexible tensile elements (13), which are extensible against a restoring force, characterized in that at least portions of the tensile elements (13) are elastically stretchable and consist, e. g., of rubber ropes or the like and the tensile elements preferably extend around as loops around reversing rollers (15).
