Abstract (en)
A drapery for suspending from a curtain rod (18) comprises a plurality of parallel rigidized panels (12) of which adjacent panels are hingedly joined to each other along their adjacent edges (14). A means such as loops (16) for suspending said drapery from the curtain rod (18) is provided. When the drapery is folded, the adjacent panels fold one upon the other, and when the drapery is extended, the adjacent panels form a continuous drapery.
