Abstract (en)  
[origin: EP0112930A1] 1. Electrically heated window for motor vehicles with resistance wires (7, 15; 21, 39, 41; 43; 51-53) affixed to the window (5; 19; 46) and means (9, 11) of connecting the resistance wires to an electrical power source and a switching device to interrupt the heating circuit, characterized in that one or more of the resistance wires (7, 15; 21, 39, 41; 43; 51-53) are located in such a way as to form the outline of an emblem (45) and/or lettering (13, 37, 55).
