Abstract (en)

[origin: US4570421A] For filling and closing cartons, the latter are filled via the open bottom and then conveyed along an angular transport track. Fixed folding means for folding inner tabs (15 to 18) and outer tabs (19 to 22) solely as a result of the relative movement of the carton are located in the region of two conveying stages (42, 62). In the region of the second conveying stage (62), the carton has a relative position which has turned through 180 DEG .
