Abstract (en)
[origin: FR2557466A2] Rollerskate with propulsion, comprising a control device consisting: - of a stirrup piece 40 comprising a first spindle 39 on which is articulated the rear of the pedal 6, the said stirrup piece pivoting about a second spindle 54 integral with the chassis, - of a central body 42 pivoting about a third spindle 57 integral with the chassis, the said spindle dividing the body into two parts, a first part carrying a hook 59 facing the stirrup piece 40, and with which it is capable of interacting, and an idle pulley 43, a second part forming an arm 60 at whose end is fastened a part 51, 52 of the braking device, - and of a ratchet 49 in a U-shape, articulated on the third spindle 57, an upper lateral branch 61 of the U being capable of interacting with the stirrup piece 40, the other lower lateral branch 62 with a toothed wheel 48 being provided on the movement transmission device, the said ratchet comprising a return spring placing the branch in contact with the toothed wheel when the other branch is not in contact with the stirrup piece. <IMAGE>
