Abstract (en)
[origin: FR2555976A2] The invention relates to lifting and unloading equipment comprising a single motor and a single cable which can, with the aid of this motor and cable, carry out vertical and then horizontal movements, or vice versa. It comprises a horizontal support 26 carrying a sliding monorail 23 in which there is locked automatically, at one end 24, a carriage taking up the load 22 which is moved and unlocked automatically at the other end 25 in order to set down the load 22. The carriage is returned from the end 25 to 24 by means of a spring winder. All these movements are actuated solely by the winch 21. <IMAGE>
