Abstract (en)

[origin: EP0114220A1] 1. Bridge spacer block for the fixing of glass sheets or the like in door or window frames, comprising a crutchlike bridge member, especially of injection moulded plastics material, which has a groove extending throughout its length and widening at both ends of the bridge member in funnel-shaped manner towards transverse corner faces at the apices of two support legs of the bridge member, characterized in that a plurality of gripping projections (26) spaced from the transverse corner faces (23) are provided on at least one outer longitudinal side face (25) of the support legs (24).
