Abstract (en)
[origin: EP0114355A2] Arranged at the rear end of the displaceable unit (1) surrounding the lock is a hammer-like cocking lever (2) which is actuatable from outside and acts on the cocking spring (3) and which can be maintained in the cocking position by a bolt (7) interacting with the cocking piece (9). The lock can thereby be cocked in the firing position and uncocked for safety purposes. <IMAGE>
