Abstract (en)

[origin: ES8506838A1] Procedure for the preparation of aqueous compounds of polymal acid, tenseactive and complexing. Comprises the following operations: first, it is dissolved under agitation in hot water and at room temperature, the solid parts of a non-ionic or anionic surfactant or its mixtures, laterly encouraging the solution obtained at ambient temperature; second, the remaining liquid parts of the components, which include between a 1.5 and a 20 in the weight of a hydrolyzed polymal acid anhydride or its salt, are anticipated in connection with such solution; and last, an ade to the solution between a 2.5 and a 25 in weight of a general formula complex (I). Abstract (de)

Wässrige Zusammensetzungen, die ein hydrolysiertes Polymaleinsäureanhydrid, einen Komplexbildner und ein Gemisch aus einem nichtionischen und anionischen Tensid enthalten, eignen sich als Hilfsmittel zum Aufschliessen Cellulose enthaltender Fasermaterialien.
