Abstract (en)
[origin: WO8400675A1] Walking devices to help train infants to walk, having a base (10) and an annular support structure (13). The annular support structure (13) supports an infant and allows said infant to walk around the base (10). The annular support (13) is connected to the base (10) by the post (11) allowing the support (13) to rotate around a vertical axis defined by the post (11).
