Abstract (en)  
[origin: EP0115740A1] 1. Foldable fastener for a bracelet with a stiff support (1) having longitudinal beams (2, 3) and comprising at each of its extremities an articulated arm (5) fastened at one extremity to a strap of the bracelet and capable of being pressed down on said support for being rendered integral thereof, characterized in that each articulated arm (5) is provided on its external lateral sides with a profile (P1) having a length equal to at least half of the length of the articulated arm (5), said profile (P1) engaging, in the pressed down position of the articulated arm, in a profile (P2) of complementary form and of corresponding length provided in the internal lateral sides of the longitudinal beams (2, 3) the articulated arms (5) comprising elastic means operable to be adjusted for ensuring a snap fitting of the articulated arms (5) on the stiff support (1).
