Abstract (en)
[origin: EP0116013A2] Partitions (8, 20) can be inserted at any desired point in drawers (1) made of steel or plastic by means of holding elements (14, 18) which can be plugged into the shell walls (2, 3) or into the partitions (8). The holding elements (14, 18) have a slot (16) to receive the partition (8, 20) and one or more pins (17) or boreholes (19) for attachment to the drawer walls (2, 3) or the partitions (8, 20). Slot-shaped incisions (32) are made in the pins (17) extending parallel to their longitudinal axis. The ends of the pins (17) are preferably provided with beaded thickenings (30, 31) which fasten the holding element (14) to the wall (2, 3 or 8, 20). <IMAGE>
