Abstract (en)  
[origin: WO8303494A1] An electric power distributing bus-bar or cable comprising a carrying line (10) and electric conductor parts (11-15). The carrying line (10) and the conductor parts (11-15) are disposed in a common electrically insulated jacket (16) and the electric conduction capacity of the carrying line (10) is adapted to and preferably similar to that of each one of the conductor parts so that the carrying line (10) may be used as a complementary conductor.
