Abstract (en)
[origin: EP0116138A1] 1. Insulation for a hard stone roofing, which insulation preferably consists of laminated rigid foam boards which can be fastened abutting each other on the rafters and bear roof battens as retainers for the hard stone roofing, characterized in that the abutting faces of the rigid foam boards (4) parallel to the roof battens (7) are designed as mutually opposite wedge-shaped projections (5) or recesses (6) adapted to the wedge-shape, angular extensions (8) of roof battens (7) supported on the top side of the rigid foam boards (4) reaching over the projections (5) and receiving angles (2), which can be fastened on the rafters (1) protruding into the recesses (6).
