Abstract (en)

[origin: US4557133A] A press unit having gripper rails to be exchanged at the same time as the tools, wherein in hollow spaces of the ends of the gripper rails, means are inserted for the locking of the form-fitting or toothed connection of gripper rails on the side of the press and gripper rails on the side of the tool that are to be connected with one another for the transfer of workpieces. The device comprises a control element, a pressing rod that can be acted upon by the control element, and a locking member connected to said pressing rod, with said locking member being slidable in a preferably press side end of the gripper rails and a mating piece for receiving the locking member during the form-locking or toothed connection of the ends of the gripper rails and being slidable in an end at the side of the tool.

Abstract (de)

Umsetzvorrichtung bei einer Presseneinheit, insbesondere bei einer Stufenpresse, od. dgl., mit beim Werkzeugwechsel austauschbaren Schienen (12, 13) für eine Greifvorrichtung. Die Kupplung zwischen den Schienenstücken besteht aus ineinandergreifenden (52) Klauen an den Schienenenden und einer Verriegelung im 51, 52, 53, 56 Inneren der Schienenenden (73).
