Abstract (en)

[origin: EP0117420A2] 1. Machine for the separate application of a hardener layer and a glue layer on the two faces of a board-shaped workpiece, characterized in that arranged on a machine stand (1) is a first support (2) which has a first lower applicator roller (3) for applying the primer or hardener to the lower face of the workpiece (26), in that this support (2) also has a second vertically adjustable roller (11) for applying the primer or hardener to the upper face of the workpiece (26), and in that arranged thereafter on the same machine stand (1) is a second support (17) which has a first lower roller (18) for applying a glue layer on the lower face of the board-shaped workpiece (26) and a vertically adjustable roller (22) for applying a glue layer to the upper face of the board-shaped workpiece (26).
