Abstract (en)

A unit for moving a series of lengths of drill pipe between an active position of alignment with a well axis and laterally offset inactive positions, and including an elongated preferably flexible element (28) adapted to be connected to a pipe section (23) and exert a pulling force thereagainst in a manner moving it past a guide structure (29) to the desired inactive position. The guide structure (29) may be connected to a carriage (30) which is ovable to shift the guide structure for racking pipes in a series of different rows.
