Abstract (en)  
[origin: EP0118853A2] 1. Apparatus for cleaning and filling the storage vessels of automatic milk tapping systems, in which during cleaning the inner walls of a storage vessel are sprayed at least once with a liquid cleaning agent and the dirty liquid is pumped out of the storage vessel, characterized in that a cleaning device (17) equipped with a fresh-water tank (22) for the storage vessel and a mild tank (20) with a capacity many times greater than that of the storage vessel are arranged on the loading surface (18) of a heavy-goods vehicle (16) next to a support surface for at least one automatic milk tapping system (44), and the cleaning device (17) and the milk tank (20) can be connected to the storage vessel automatically and in succession via a pumping device (52).
