Abstract (en)

[origin: EP0119391A2] 1. Fabric pull-off device for knitting machines, especially flat bed knitting machines, with a driving motor and an associated adjusting device for varying the pull-off force of the driving motor, characterized in that the driving motor (12) is a per se known three phase rotating field motor and that the adjusting device (13, 13') is provided by a phase cut-off control circuit (26, 26') which is provided with inputs (27, 28, 32 to 34, 39) for the setting of the nominal value and for at least one true value derived from the driving motor (12).
