Abstract (en)

[origin: US4537130A] A stripper for a printing machine cleaning device includes a shaped pressure hose, which is disposed parallel to the roller of the printing machine that is to be cleaned. The cross-sectional shape of the hose can be varied by being pressurized. The surface of the pressure hose remote from the roller is secured on a rigid rail, while the surface of the pressure hose remote from the rail can be pressed, as a result of pressurization of the hose, against the roller.
