Abstract (en)

The multi-purpose basket consists of three cylindrical sections (1a,b,c) of decreasing diameter on top of one another. Each section has a top peripheral rim joined to the base by thin, parallel, vertical bars spaced by the width of each bar. The basket can be extended to the full height of its three combined sections or telescoped inside each other. The bottom section (1c) has a mesh base on which a dish may be placed to catch liquid. Along the top rim of the middle and bottom sections (1b,c) are equidistantly spaced lugs, sticking outwards and fitting into the vertical slots of the sides of the sections above.

Abstract (fr)

La présente invention regarde un panier à différents usages, moulé en plastique, réductible en hauteur, étant composé de trois étages (1a, 1b, 1c) cylindriques de diamètre décroissant, roulant l'un dans l'autre en guise de longue-vue. Le panier résulte, en outre, équipé d'un manche (6) demi-circulaire et d'une cuvette ou d'une assiette (5) que l'on appliquera, à encastrement, sous le fond (2).
