Abstract (en)
[origin: EP0120372A2] 1. An etui-like case of elastic material which has at least one side open and serves to store and transport appliances for personal and manual use, whose side walls provide a bed conformed fully or in part to the contour of the appliance it is to hold, with the side walls of the case abutting fully or in part the appliance it is to receive and holding the appliance in position by positive engagement therewith, characterized in that the side walls (2, 3, 4, 5, 6) of the case (1) are inherently elastic and elastically extensible and in that one or several recesses (8, 9, 10, 14) extending in longitudinal and/or transverse direction to the side walls are provided in one or several of the elastically extensible side walls (2, 3, 4, 5, 6).
