Abstract (en)

1. A system for the insulating closure of wall openings by a glazed element (3) associated with a folding shutter (8) which is made of insulating material, is located internally with respect to the opening and, with said glazed element, delimits a free space, a device capable of reflecting the heat-bearing rays of the sun being associated with said folding shutter (8), characterized in that said device is completed by means permitting the folding shutter (8), at will, to reflect or absorb the sun's rays.

Abstract (fr)

A l'élément vitré (3) de fermeture d'une baie de bâtiment est associé un volet pliant et isolant (8) qui est situé à l'intérieur par rapport à la baie et délimite avec cet élément vitré, un espace libre; et à ce volet pliant (8) est associé un agencement grâce auquel il peut réfléchir les rayons solaires porteurs de calories.
