Abstract (en)
[origin: US4594420A] Compounds of the formula <IMAGE> wherein X denotes a chlorine or bromine atom, n denotes a number from zero to 4 and Y denotes an oxygen atom or a nitrogen atom, and A, if Y represents an oxygen atom, is the phenyl radical, which can be substituted by substituents from the group comprising halogen, C1-C4-alkyl, C1-C4-alkoxy, carbalkoxy with 1-4 carbon atoms in the alkyl radical, hydroxyl, carboxyl, CF₃, nitro, phenoxy, phenoxy which is substituted by C1-C4-alkyl, C1-C4-alkoxy and/or halogen, phenylamino, phenylamino which is substituted in the phenyl radical by C1-C4-alkyl, C1-C4-alkoxy and/or halogen, phenylazo and phenylazo which is substituted by C1-C4-alkyl, C1-C4-alkoxy and/or halogen, or is the pyridyl radical, which can be substituted by halogen and/or C1-C4-alkyl, or A, if Y represents a nitrogen atom, is the o-phenylene radical, which, together with Y and the other nitrogen atom, forms the benzimidazole ring, it being possible for the benzene nucleus of the benzimidazole ring to be substituted by substituents from the group comprising halogen, C1-C4-alkyl and C1-C4-alkoxy, processes for their preparation and their use as colorants or their use as intermediates for the preparation of colorants.
