Abstract (en)

[origin: EP0122726A1] A means for forming a fluid-contacting surface on such as a stationary deflector or a blade (1), of a rotatable impeller or propeller, and any device incorporating or provided with such fluid-contacting surface, wherein said surface comprises at least part of the surface generated by a generating line (OP) extending radially from a point of origin (O), on a axis (Z), and rotated about said axis from said point and radial position so as to sweep through a decreasing
