Abstract (en)
[origin: EP0122859A2] 1. Sealing piece for the joining, between four panels, of sealing trimmings (1-4) made as V-section extruded profiles arranged each between two adjacent panels which are rigid but capable of relative displacement, the sealing piece comprising a central connecting chamber, characterised in that the sealing piece is made of the same material, rubber or elastomer, as the sealing trimmings (1-4), in that it comprises a group of bellows elements, one per linear sealing trimming, terminating in the central chamber, and in that the central connecting chamber has a centre (12) in relief relatively to the bottom of the V sections of the linear trimmings (1-4).
