Abstract (en)

A slide gate nozzle (1) of a metallurgical vessel (15) is made independent by providing means for detaching at least one element (9) from an upper plate (3) mounted in a removable manner on the gate nozzle (1) before positioning the latter under the vessel (15). The conditions of use of the said gate nozzle (1) are thus improved. <IMAGE>

Abstract (fr)

On rend un dispositif de fermeture coulissant (1) d'un conteneur métallurgique (15) indépendant en prévoyant des moyens pour désolidariser au moins un élément (9) d'une plaque supérieure (3) montée de manière amovible sur le dispositif de fermeture (1) avant la mise en place de ce dernier sous le conteneur (15). On améliore ainsi les conditions d'utilisation dudit dispositif de fermeture (1).
