Abstract (en)

[origin: EP0122981A2] The invention relates to a container for a hook and loop fastener, wherein the two tape-shaped component parts of the fastener are each received in the form of a roll. According to the invention the container comprises two compartments which each receive one of the rolls, the cross-section of each compartment having the form of at least a portion of a circle, while the compartments are provided with a common outlet through which the co-operating tape-shaped component parts may be dispensed as a coupled hook and loop fastener.
