Abstract (en)

[origin: EP0123011A2] 1. A form (1) for ceiling edges including a supporting sleeve (5) which is adapted to be encased in concrete or sunk into the upper area of a wall (4) and serves to receive a tie (6) or the like for supporting a form panel (2) and/or a rail (3) holding the latter or a similar support for the front end of the ceiling (8), characterized in that the supporting sleeve (5) has a female thread fitting the male thread (10) of standard formwork tie rods, and that a formwork tie rod is provided as the tie (6).
