Abstract (en)

1. Permanently deformable sealing sheet in at least two dimensions, particularly for use in the building construction and the civil engineering, consisting of at least two layers (2, 3) of an elastomer material provided with a modular metallic wire mesh, characterized by embedding a copper wire mesh (4) between two layers of vulcanizable EPDM rubber (2, 3), with at least one of the elastomer layers (2, 3) being stabilized by a reticular film.

Abstract (de)

Zur Abdichtung insbesondere von Dachanschlüssen aller Art ist ein plattenförmiges Abdichtungsmaterial (1) vorgesehen, das erfindungsgemäß aus mindestens einer Elastomerschicht (2, 3) mit einer modulierbaren, metallischen Drahteinlage (4), z.B. in Form eines Drahtgeflechts, besteht und somit beliebig dreidimensional verformbar ist.
