Abstract (en)
[origin: EP0123354A2] The method for the repetitive printing of cheques and similar forms, according to the invention, comprises the steps of:
(a) piling up a plurality of cheques in a plurality of boxes, each box containing cheques of the same shape, type, color, denomination and the like disposed with the front side thereof facing outwardly; (b) transferring a selected one of said boxes in front of a drawing station for drawing the first cheque of the pile out of the related box; (c) conveying said first cheque along a track leading to a printing unit; (d) printing said front side of said first cheque while the same passes through said printing unit; and (e) discharging said printed cheque into a collecting zone. The equipment for carrying out the above method comprises a rotating unit (4) having a plurality of boxes (2) circularly disposed, each box having an opening (8) and each adapt to contain a plurality of cheques (3) of the same shape, type, color, denomination and the like disposed with the front side thereof facing outwardly, a drawing station (10) positioned near said rotating unit (4), a track (15) for conveying individual cheques from said drawing station to a printing unit (20), means (30) for transferring said printed cheques from said printing unit to a collecting zone (31), and electronic means (29-36) for controlling the operation of said equipment.
