Abstract (en)

[origin: ES8502935A1] Disclosed herein is an apparatus that comprises a station for infeeding containers that subsequently pass inside a net carrying pipe and are supplied to a station where each container is enshrouded in a net and at which there is a station for fixing the reinforcing strips to the containers as well as a station for labelling the said containers, all the said stations operating automatically and on a time relationship basis, one with the other.

Abstract (fr)

L'appareillage objet de l'invention comporte un poste (12) d'alimentation de conteneurs (C) qui passent ensuite à l'intérieur d'un tube (1) porte-filet et sont délivrés à un poste (17) d'enveloppement de filet en paquet autour de chaque conteneur (C), où il y a également un poste (24) d'application des bandes de support aux conteneurs et un poste (29) d'étiquetage de ces derniers, tous les postes précités agissant en phase et automatiquement.
