Abstract (en)
[origin: EP0124361A2] This invention relates to building units of the general kind described in United Kingdom Patent Specification No. 1 528 743. The building unit of the present invention differs from that of the prior Specification primarily in that the closure means (10) comprises at least two floor portions (11 and 12), one of which (12) is rotatable about a fixed axis (hinges 14 and 16) fixed relatively to the upper floor (26) and the other (11) of which is hingedly connected (13) to the first portion (11). The free edge of the second floor portion (11) is provided with rollers (38 and 39) which run in rails (17 and 18) fixed relatively to the floor.
