Abstract (en)  
A portable photocopier comprises an elongate housing accommodating a roll (25) of sensitised paper (71) and a feed mechanism for feeding the paper (71) from the roll passed a corona wire (47) for electrostatically charging the paper (71) to a location for illuminating (13) the charged sheet in contact with a document to be copied and then to a device for applying toner (43) to the charged exposed paper and for fixing (41) the toner. The copier is traversed across the surface of the document to be copied by the movement of the paper.
